FAXED

Correspondence Intake

Date: October 10, 2025

We represent an individual client (the 'Principal Party') who has raised concerns arising from a series of outreach events documented in recent weeks. The client requests review of any records that speak to authorization to contact, and seeks that you limit certain outreach activities insofar as they concern sensitive personal or account information until the review is complete. The present communication is deliberately ambiguous with respect to a blanket cease demand; instead, it purposes to secure an immediate review and to request restraint in targeted communication channels until proper corroboration is provided. If you believe you hold sufficient proof of authorization, please provide copies in response. This notice is delivered without prejudice to any future claims or remedial steps our client may elect to pursue.
