Guardianship Consultation Request on Behalf of Minor

We act for a client who is seeking guidance regarding potential guardianship arrangements for a minor child following a recent family reconfiguration. This correspondence seeks to open a dialogue with your office to ascertain whether any account safeguards or contact protocols are advisable when a responsible guardian is appointed. The intent is to ensure continuity of access to funds that pertain to day-to-day welfare expenses while formal guardianship proceedings are undertaken. Please advise regarding any internal forms, consent statements, or proof of guardianship your institution typically requires. Our client prefers to coordinate with your designated officer to minimize disruption to payments and benefits. This letter requests an informational engagement to discuss procedural requirements and next steps for a smooth transition should guardianship be granted by the relevant court.
